

ANDINGREDIENTS

High performance single ingredients

andnutrition.com

AND INGREDIENTS

ANDIngredients works with **advanced raw materials that improve animal nutrition, productivity and sustainability**, providing a top quality alternative to traditional additives. Our products help improve the efficiency and productivity of the feed.

Our commitment is to offer animal nutrition that also improves intestinal health and immunity, promoting a more efficient and sustainable production model.

FOR A HEALTHIER, MORE PRODUCTIVE AND RESPONSIBLE FUTURE

We offer commodities and semi-commodities to:

Reinforce the immune system

Support muscular growth and recovery

Provide a source of energy and fibre

Improve digestive and intestinal health

Improve the absorption of certain minerals

Improve the synthesis of neurotransmitters

Control pathogenic bacteria

AND OBJECTIVE

Innovating for
Animal Productivity and Performance

Contribute to more efficient and sustainable livestock production by developing innovative and scientifically supported solutions that replace antibiotics in animal feed, and offer top quality and highly effective products adapted to each client's needs to improve productivity and health.

COMMODITIES	SEMI-COMMODITIES
AMINO ACIDS	TRIBUTYRIN
DEXTROSE	MONOBUTYRIN
VITAMINS	MONOLAURIN
LAURIC ACID C12	BUTYRATE
CAPRYLIC ACID C8	LIGNOCELLULOSE
CAPRIC ACID C10	BISCUIT FLOUR

What functions do we highlight?

COMMODITIES

Amino acids

- Essential source of protein.
- Reinforces the immune system.
- Supports muscle growth and recovery.

Dextrose

- Rapid energy source.
- Improves the absorption of certain minerals.

Vitamins

- Reinforces the immune system.
- Maintains bone health and neurological function.
- Antioxidant protection.

Lauric Acid C12

- Contributes to immunological health.
- Natural anti-microbial activity.
- Highly digestible energy source.

Caprylic Acid C8

- Quick source of energy.
- Favours a healthy intestinal environment.
- Helps combat bacteria, fungi and yeast in the intestine.

Capric Acid C10

- Source of sustained energy.
- Improves the metabolism of fats.
- Anti-microbial activity.

Tributylin

- Odourless and highly fluid.
- Improves the integrity of the intestinal barrier.
- Anti-inflammatory properties at a digestive level.

Monobutylin

- High concentration with optimal fluidity.
- Help control pathogenic bacteria.
- Promotes intestinal health through the release of butyrate.

Monolaurin

- Microbial agent.
- Facilitates the digestion and absorption of fats.
- Versatility of formulations.

Butyrate

- Odourless and highly fluid.
- Main source of energy for colon cells.
- Improves intestinal health and reduces inflammation.

Lignocellulose

- High percentage of crude, non-digestible fibre.
- Manufactured in Europe, in powder or granulated.
- Low humidity percentage.

Biscuit flour

- Highly digestible.
- High quality and plastic free.
- Great uniformity between lots.

ANDINGREDIENTS MAIN BENEFITS

Certified suppliers

Our suppliers are audited and approved in our laboratories.

Improvement of feed conversion and performance

Greater efficiency in livestock production.

Optimisation of intestinal health and immunity

Solutions aimed at animal well-being and prevention.

Format versatility

Products adapted to the client's needs (from cans to ibc).

Feed safety and sustainability

Aligned with the objectives of a more responsible production.

Added value

Without organoleptic contamination.

ANIMAL NUTRITION DEVELOPMENT

AND is a Spanish company specialized in the **development of nutritional and functional solutions for the FEED sector**, with a focus on innovation and sustainability.

Advanced nutrition solutions for feed.

Innovative and **scientifically supported nutritional solutions** for animals, helping our clients improve productivity, sustainability and health in livestock production.

- Innovation and scientific support: advanced, science-based solutions.
- Premium quality.
- Alternatives to antibiotics.
- Personalised approach and adaptability.
- Expert, committed veterinary team.
- Global leadership from Spain: international presence and recognition.
- Commitment to efficiency and sustainability.
- Continuous research and technological development.
- Support for sustainable livestock production.
